

MUHAMMAD ARIF RAMADHANI

+6285227842471 | aramadhan594@gmail.com | <https://ariframadhan01.github.io/>

I am a student who has an interest in the web, namely being a Front End developer. I like Front End because I like website design to make it more attractive and interactive for users. I love everything about technology especially being a Web Developer. I believe technology is the future of humanity. So, I will give my best to help people not because of money, just because I'd love to! Feel free to ask me for help as well as hiring me.

Work Experiences

PT. Legitima Solusi Digital Indonesia - Kudus

Web Developer

Jan 2021 - Apr 2021

- Create a company website profile that is useful for displaying a company profile so that buyers can get to know the company more deeply and introduce the services offered. The results of the website that I created can be seen at www.legitima-indonesia.com
- Make Responsive web design using figma and set the company website to be more responsive when accessed via mobile using CSS GRID
- Creating a useful login feature so that the company can upload portfolios to the company website profile using PHP CRUD

The village hall of Mijen Kaliwungu

Web Developer and Data Entry

Dec 2020 - Mar 2021

- Create a website-based application that is useful for inputting community data such as NIK, KK, Head of Family, Address, etc
- Entering Mijen village population data into the website application that I have created
- Creating a website-based application system that is useful for community social services such as complaints or proposals for social assistance funds.
